Hi, Robert:

I have a few questions, all centered on sampling of monitoring wells....

1) As part of the basin-wide sampling that occurred in December 2010, we asked Vulcan to sample the wells on the Hewitt Pit. We were unable to work out access in time, and then it rained like crazy down there, so we are just now circling back to it. They have agreed to conduct the sampling, but there appears to be some confusion about the ownership of the wells, as to whether they are owned by Vulcan or DWP, as well as who owns the property on which the wells reside. Can you help clear this up? They are hoping to sample early next week. The monitoring wells are:

<b>Well ID (Regional)</b>	<b>Alternate Well ID</b>	<b>Year Constructed</b>	<b>Total Depth (feet bgs)</b>	<b>Screened Interval (feet bgs)</b>
4909F	V14HEW9F	1987	285	225-285
4909C	V14HEWC9	1984	500	232-490
4899	V14HEW99	1984	285	120-286

2) During our meeting last week with Mr. Parekh, I understood that we should discuss the well sampling that we will be conducting in April on the sooner side, so we can get it squared away prior to the event itself. What do we need to provide to you in order to move forward on that? I am preparing a detailed list with the wells to be sampled, and instructions for each, after I analyze the results that Vahe sent us earlier today. Will that be sufficient, and if so, to whom should I send it? What else can I do to help facilitate this, and to address concerns that DWP may have?

Many thanks for your assistance on these two issues.

Take care,

Regards,
